

Bag It Cancer Impact Report 2024-2025

Expanding Hope. Expanding Reach.

Empowering cancer patients and caregivers
with tools, organization, and hope.

“After my diagnosis of Metastatic Breast Cancer, I was immediately overwhelmed. I was introduced to Bag It Cancer after attending an LBBC conference. When I received the free tote, I was very grateful. It provided great resources and reading material to help with this new journey in my care. The binder offered order and organization. I was able to house important documents, appointments and essential information about my diagnosis. Three years later I still refer to my bag. During a time of chaos and uncertainty, it was so comforting to feel supported by an organization that works to provide an essential service to cancer patients and their families.”

—T'Ana Johnson, Cancer Survivor

- Advanced Prostate Cancer
- Colorectal Cancer
- Head & Neck Cancers
- Spanish Bicultural for Advanced & Early Prostate Cancer

Together, We Make A Difference!

Patients received trusted resources. Caregivers felt supported.
Healthcare providers had an essential tool to share.

"Providing newly diagnosed patients with Bag It helps give them a starting place and empowers them to take control of their schedule. Caregivers love it too!"

Valerie Molina, RN
Brooke Army Medical Center
